State [Party]: ... SWEDEN

Reporting for time period from ...01/01/2015...to ...31/12/2015.....

1. National focal point/coordination mechanism for the implementation of article 5 (specify name and contact information of government body responsible)

Swedish law requires each county to report symptomatic injuries or sequelae of penetrating violence to a national register held by the National Board of Health and Welfare. However, the counties do not document and communicate injuries caused specifically by cluster munitions. The reason for this is the difficulty to determine (diagnose) the cause of an injury months or even years after an incident has occurred.

3. Development and implementation of national laws and policies for implementation of article 5

On ratification of the Convention, Sweden considered that existing national legislation, incl. the Swedish Health and Medical Services Act (1982:736), was sufficient to fulfil the obligations arising from Article 5 of the Convention.
