Measures

New Zealand retains operational stocks of M18A1 Claymores which are operated in the command-detonated mode only. These devices are not antipersonnel mines, as defined in Article 2 of the 1997 Ottawa Convention and are therefore not prohibited under the Convention. Other than the M18A1 Claymores, the New Zealand Defence Force holds a very limited quantity of inert practice mines, used solely in the training of personnel in Mine Clearance Operations, in accordance with Article 3 of the Convention.
