Email: ised@mfat.govt.nz

(Name, organization, telephone, fax, email)

(ONLY FOR THE PURPOSES OF CLARIFICATION)
Form J Other relevant matters

Remark: States Parties may use this form to report voluntarily on other relevant matters, including matters pertaining to compliance and implementation not covered by the formal reporting requirements contained in Article 7. States Parties are encouraged to use this form to report on activities undertaken with respect to Article 6, and in particular to report on assistance provided for the care and rehabilitation, and social and economic reintegration, of mine victims.

State [Party]: New Zealand reporting for time period from 01/01/2013 to 31/12/2013

New Zealand retains operational stocks of Change Directional Fragmentation M18A1 Claymores which are operated in the command-detonated mode only. These devices are not anti-personnel mines, as defined in Article 2 of the 1997 Anti-Personnel Mine Ban Convention and are therefore not prohibited under the Convention. The New Zealand Defence Force holds a very limited quantity of inert practice mines, used solely in the training of personnel in Mine Clearance Operations.

Mine Action Programmes:

UNMAS

In 2013 New Zealand provided NZ$1m in untagged flexible core funding to UNMAS (the UN Mine Action Service), to support the organisation's work in removing and destroying mines, explosive remnants of war and stockpiles, risk education and advocacy.

Cambodia

The New Zealand Aid Programme is providing US$1 million to fund a project, which runs from 2012 to 2014, on landmine and unexploded ordnance clearance in Cambodia. New Zealand’s contribution is part of a larger contribution of US$2.5 million (NZ$3.27 million) for a three-year agricultural development project in heavily affected Odtar Meanchey province. The mine clearance funding by New Zealand will be conducted by the HALO Trust. The agricultural programme aims to reduce vulnerability and improve income and livelihood opportunities for the rural poor through integrated demining and agricultural value chain strengthening.

West Bank

Since 2011, New Zealand has contributed NZ$2.7m to UNMAS’s West Bank De-Mining Programme. The programme has assisted with the development of a Palestinian Mine Action Centre (PMAC) capable of overseeing all aspects of mine action within the West Bank.

Over 2014 and 2015, New Zealand will also contribute NZ$3.1m towards the HALO Trust’s operational demining activities in the West Bank.

Egypt
Following earlier funding to the UNDP/Egyptian Government mine and unexploded ordnance clearance action programme, in 2013 the New Zealand Aid Programme contributed NZ$600,000 for a UNDP project to develop agriculture in previously mined land in Egypt.

**International Committee of the Red Cross (ICRC)**

The New Zealand Aid Programme provides NZ$2.5 million each year in untagged core funding to support ICRC’s work, including physical rehabilitation and preventative unexploded ordnance action programmes which focus on risk reduction, education and advocacy work. Those programmes aim to reduce the human cost of mines and explosive remnants of war.

**Other international/UN agencies**

The New Zealand Aid Programme also prioritises core funding to other UN agencies such as UNICEF, UNDP, UNHCR, OCHA, OHCHR and WFP, all of which undertake unexploded ordnance clearance activities as part of their work. Funding is also directed to the World Bank, which helps address the long-term consequences of landmines on economic and social development.
